Davis Wagon Services ECM accreditation.

Davis Wagon Services is pleased to announce that it's been successful in its application to become an accredited Entity in Charge of Maintenance. Our accreditation demonstrates compliance with the requirements of The Rail and Other Guided Transport Regulations (ROGS) through the European Directive EU (No) 445/2011 relating to Entity In Charge of Maintenance (ECM) regulations.

Through the accreditation which is awarded by the Office of Rail Regulation, Davis Wagon Services can provide through Safety Management Systems all four of the functions associated with the regulations:

1. Management Function
2. Maintenance Development Function
3. Fleet Maintenance Management Function
4. Maintenance Delivery Function

Our certification has been awarded for a period of five years and will be continually assessed throughout the duration of the certification.

Davis Wagon Services has been operating since 2007 and provides nationwide coverage for the planned and un-planned maintenance of freight wagons in the UK. A team largely based at the headquarters in Immingham currently provide;

- Management Function
- Fleet Maintenance Management

Outstation locations based throughout the UK and mobile teams undertake the Maintenance Delivery Function.

Davis Wagon Services is a subsidiary of W. H. Davis Ltd who have constructed and maintained railway wagons in the UK for over 100 years. Maintenance Development Function is currently undertaken by an Engineering team based at the parent company headquarters in Nottinghamshire.

If you require any further details on Davis Wagon Services, please call:

Richard Simons (Managing Director) or John Hall (General Manager) on 01469 576600 or visit www.whdavis.co.uk
